"The key feature of HyperMotion is a fully-functioning, fully-interactive Player Impact Engine," explained Cristiano Bertolucci, HyperMotion Technical Director. "This allows us to incorporate real-time player actions on the pitch and replicate the live behaviour seen through real players and injuries. We have even captured an incredible statistic: the most tackles ever recorded in a single season of real-life football." "Accurate Player Interactions inside the digital World Player have been improved and they now respond dynamically to each action, injury or open space on the pitch, such as fouled players," Bertolucci continued. "The goalkeepers can even use the tools developed by our team of game developers to create more intelligent behaviours for penalty kicks and headed goals. It is an incredible amount of detail – so much so that, for example, a goalkeeper's dive to catch a ball could be recreated with the physics engine of FIFA." Fans who pre-order the EA SPORTS Season of Champions Edition, as well as FIFA Ultimate Team, will get early access to the latest FIFA features, including new Player Impact Engine visuals and the Frostbite Arena. - Pause The Game – Use the new Pause The Game option to avoid distractions. Stop the ball being played, manage any last-minute changes or get a break from your opponent, whoever is controlling the ball.
- Premium Player Pack – Get the best new players and grow your Ultimate Team into a formidable team. Buy them or earn them, and form the Ultimate Team.
